CONVERSION OF EXISTING PARKING STRUCTURE INTO STATE-OF-THE-ART MUSEUM

LOCATION Chicago, Illinois

SIZE 4 stories, 70,000 sf

Eckenhoff Saunders converted an existing parking structure into a state-of-the-art facility as part of a design-build team with Pepper Construction.

The four-story, 70,000 sf building houses exhibits, the Radio Hall of Fame, a multimedia café, administration offices, and multipurpose screening space. Designed for LEED Gold Certification, the layout reflects the museum's identity and commitment to celebrating all forms of media.
