

SILVER CROSS HOSPITAL - LABOR, DELIVERY, RECOVERY

DEVELOPMENT OF THREE NEW LABOR, DELIVERY, AND RECOVERY ROOMS

CLIENT Silver Cross Hospital

LOCATION New Lenox, Illinois

SIZE 3,600 sf

Silver Cross Hospital (SCH) retained Eckenhoff Saunders to design three new Labor, Delivery, and Recovery (LDR) rooms adjacent to the current LDR wing on Level 3 of the existing hospital. In addition to adding three new spaces, the other main goal of the project was to incorporate labor tubs into each room, allowing SCH to provide expanded service options to its patients. Eckenhoff Saunders worked closely with the user group and facilities team to include the labor tubs into the rooms while keeping the basic design and layout of SCH's current LDR rooms. The room layout allowed for better staff efficiency going between new and existing spaces.
