

MICHIGAN ECO RESORT & SPA

LUXURY ECO RESORT DEVELOPMENT IN RURAL MICHIGAN

CLIENT Southgate Management PR, LLC | **LOCATION** Buchanan, Michigan | **SIZE** 127 acres

PROJECT SCOPE

The Michigan eco resort and spa are a year-round, luxury property tucked into the land of southwest Michigan. Its design is ecologically focused on a renewable energy infrastructure and an architecture that quietly merges with its setting.

It offers guests a complete immersion in nature, yet it is only a 90-minute drive from Chicago's Loop. Located near the small towns of Buchanan and Three Oaks, the resort offers 44 guest pavilions on the property for the weekend, week-long or extended stays. A guest lodge includes amenities for dining, spa treatments, and small conference events. Additional amenities include a lakeside boathouse for kayaking, canoeing, paddleboarding, and sailing. An adjacent pool is provided for those who want an alternative to lake swimming.

An extensive network of hiking paths and boardwalks will connect all guests to the woods, lake, wetlands, and pastures. The resort is also ideally positioned for country road biking linking the many vineyards in the surrounding area. The guest experience will be one of privacy, solitude, physical immersion in a beautiful natural setting, and local food, wine, and small towns of southwest Michigan. All of this is offered within an ecologically sustainable and responsible environment of renewable solar and geothermal energy, minimal land and lake disturbance, prefabrication of all construction, and re-use of on-site hardwoods. The Michigan eco resort will provide guests with an authentic luxury experience within a highly accessible distance of Chicago
