

CARLE ORTHOPEDICS AND SPORTS MEDICINE

62,000 SQUARE FOOT SPORTS MEDICINE FACILITY

CLIENT Carle Health | **LOCATION** Champaign, Illinois | **SIZE** 62,000 sf

PROJECT SCOPE

The 62,000 sf facility brings Carle's Sports Medicine Program and Outpatient Orthopedic group under one roof, with additional space for orthopedic research through a partnership with the University of Illinois. A two-story public lobby and waiting area support registration functions located at the entrance to each wing of the facility.

The west wing of the building allows Carle to expand its Sports Medicine program, including Sports Training that supports athletes throughout the community. This area includes lockers, exam rooms, and training therapy rooms. The east wing of the facility houses the Orthopedics group, supporting foot and ankle, trauma, hand, and joint specialties. All exam rooms are designed on a 140 sf module to help all orthopedic functions and to provide flexibility in future use changes. The main street leads the visitor into the wing, with specialty clinics identified at intersections. Each clinic is closely associated with team work stations, cast rooms, support rooms, and physician rooms that support that specialty.
