

DULY HEALTH AND CARE -WESTMONT

3-STORY, 50,000 SF MEDICAL OFFICE BUILDING INTERIOR BUILD-OUT

CLIENT Duly Health and Care | **LOCATION** Westmont, Illinois | **SIZE** 3-story, 50,000 sf

PROJECT SCOPE

Duly Health and Care's 50,000 sf medical office building in Westmont consolidates and expands smaller practices in the area into a local multi-disciplinary hub. Eckenhoff Saunders designed the interior build-out of the three-story building to welcome patients into a calm and healing environment.

Exam and procedure spaces are organized around open nurse stations, allowing for efficient, connected care, and offering patients a visual connection to the outdoors. The specialties provide a broad range of services to the local community, including Immediate Care, Cardiology, Pulmonary, Orthopedics, Physical and Occupational Therapy, Obstetrics, and Gynecology. Essential Diagnostic Imaging services include mammography, bone density, ultrasound, x-ray, and MRI. In addition, the Cardiology practice offers more specialized diagnostics with a nuclear camera, stress lab, echo, and stress echo equipment. The on-site Hematology Lab provides immediate analysis for all the practices.
