

NAPLES RESIDENCE

4,000 SF CUSTOM HOME IN SOUTHWEST FLORIDA

LOCATION Naples, Florida | **SIZE** 4,000 sf

PROJECT SCOPE

This 4,000 sf custom home uses the area's spectacular vegetation as a striking setting for its design. Large windows strategically placed throughout the public spaces provide views of the lagoon and nearby golf course. Seashell curves and fanning roofs push the design envelope, while stucco walls, stone floors, and earth-tone finishes help unify the architectural traditions of southwest Florida.

The entire property is ADA accessible complete with an elevator in the main house, wide hallways and bathrooms, and exterior walkways with ramps descending to the pool. It features three bedrooms, five full bathrooms, several lounging areas, and a guest house.
